Description

R Best, LLC is a Chicago based alternative asset manager focused on developing alpha generating strategies. R Best provides risk management and operational oversight for its flagship systematic trading program, the Private Client Institutional Program. The Private Client Institutional Program has an absolute return profile designed to achieve risk-adjusted non-correlated returns. The strategy is a 100% systematic, intraday absolute-return program that applies short-term models powered by machine learning, AI, and proprietary indicators to CME listed S&P futures. The product universe is liquid exchange-traded equity futures, traded exclusively intraday with zero overnight risk. (5)

Key Objectives

- Risk-adjusted, non-correlated absolute returns
- Low drawdowns through robust risk management
- Liquid exchange-traded equity futures, traded intraday
- Systematic models utilizing machine learning, AI, and proprietary indicators

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.

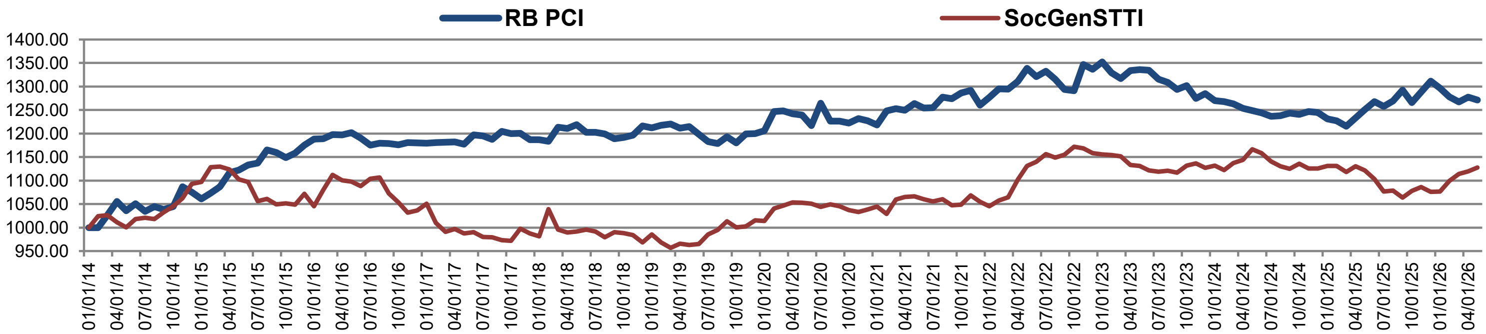
R Best, LLC

Private Client Institutional 1X
May 2026

PCI 1X VAMI vs. SocGen Short Term Trader Index (%) (Jan'14 – May'26) (1)(2)(3)(4)(5)



NOTES: Performance – Offered Program

As prescribed by the U.S. CFTC, unless otherwise noted performance is based on the actual net trading results of all accounts.(1)(2) These rates of return are inclusive of all trading-related income and expenses since January 2014. Adjustments for additions and withdrawals are made using the Time-Weighted Method as allowed by the CFTC.

(1) When calculating the yearly rate of return the Advisor resets the nominal value at the beginning of each month and as a result the yearly return is computed as an addition of all months and is not compounded.

(2) Calculations are based on monthly data beginning January 2014 to the most recent available month unless otherwise noted.

(3) Data sources for R Best Performance Statistics and benchmark indices include BarclayHedge, SocGen, S&P, and Vanguard ExUSA, and were chosen based on style class representation, accessibility and industry recognition. When evaluating the information found on this sheet, please keep a few things in mind. The mention of specific asset class performance within any publication from R Best, LLC is based on the noted source index (i.e. SocGenCTA Index, Vanguard, S&P 500 Index, etc.), and investors should take care to understand that any index performance is for the constituents of that index only and does not represent the entire universe of possible investments within that asset class. Further, there can be limitations and biases to indices such as survivorship and self-reporting biases, and instant history. The benchmarks R Best, LLC uses are current only at the time this tear sheet is released and does not consider past or subsequent small changes to these indexes. SG Prime Services and Morningstar reporting sites can be found here: **SG Prime Services** - **Morningstar**

(4) R Best Private Client Institutional Returns are based on trading of customer accounts. This includes $500k of proprietary funds through Jul'20. No material difference was made to performance as a result of these proprietary funds being included or subtracted. Rolling Six Month Returns are net of commissions, gross of fees.

(5) Performance through May'19 is inclusive of both the S&P emini and the Ten-Year treasury futures markets. Performance since is exclusively the S&P emini.

(6) This is a presentation of performance since January, 2014. Between February 1, 2010 and June 30, 2019 R Best served as a trade manager for Hehmeyer Capital Management, LLC (formerly Kottke Associates, LLC). Hehmeyer Capital Management, LLC was the CTA of record for the Hehmeyer Systematic Treasury and Equity program and is a separate entity from the Advisor. R Best, LLC acted exclusively as its trade manager. Since July 1, 2019 R Best, LLC has acted as CTA of record for the Private Client Institutional Program (formerly Hehmeyer Systematic Treasury and Equity program).

No representation is being made that a client's account will or is likely to achieve profits or incur losses similar to those shown.

Monthly Rate of Return – **Simple Addition Method** - Computed by dividing the net performance by the nominal account size of $250,000

Yearly Rate of Return – The nominal value is reset at the beginning of each month, therefore the yearly rate of return is computed as a **Simple Addition Method** of all months and is **not compounded**.

Largest Monthly Percentage Draw-Down represents the largest loss in any calendar month expressed as a percentage of beginning net asset value.

Worst peak-to-valley draw-down is the greatest cumulative percentage decline in month- end net asset value (NAV) due to losses sustained by the accounts during any period in which the initial month-end NAV is not equaled or exceeded by a subsequent month-end NAV.

ADDITIONAL INFORMATION

R Best, LLC offers prospective clients the opportunity to obtain additional information and to ask questions and receive answers concerning R Best, LLC and its trading programs and strategies. Prospective clients should contact Joseph R. Wilkins at (312) 379-0277 for additional information or email joewilkins@rbestllc.com.
