The objective of World Select Commodity 1X Program is to deliver long-term absolute returns in rising or falling markets through 100% systematic positioning in managed futures. The program seeks to dynamically construct long-short portfolios that efficiently allocate risk across 7 distinct sectors – equities, fixed income, metals, energy, currency, agricultural markets, and crypto. Note: Historical performance reflects fees in effect at the time of trading; current program fees may differ slightly.

Key Objectives

- Risk-adjusted, non-correlated absolute returns
- Low correlation to traditional asset classes
- Liquid exchange-traded futures across 7 sectors
- Systematic models utilizing absolute and relative momentum, market volatility and correlations, term-structure based signals, and relative market/sector valuations

THE RISK OF LOSS IN TRADING COMMODITY INTERESTS CAN BE SUBSTANTIAL. YOU SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION.

Effective January 2026, the proprietary notional value was increased to $250,000 to include the crypto sector. The offered World Select Commodity 1X program requires a $250,000 minimum notional value, a 1.5% management fee, and a 15% incentive fee. Proprietary performance is presented for illustrative purposes only and is prominently labeled as such. While the advisor believes there **are no material differences** in the trading approach between past client performance, the proprietary account, and the expected performance of the offered program, **differences may exist** due to factors such as funding levels, risk parameters, execution, leverage, or other account-specific considerations. All performance is presented net of applicable fees unless otherwise stated. Clients trading the offered program may experience different results.
